

Median Endowment

This value was extracted directly from the [Datausa.io database](#).

University Information

Name, UID, Address, non-profit status, student count, religious affiliation, control type, and location type are derived from <https://nces.ed.gov/collegenavigator/> 2023 data year. A database that keeps historical data about universities and colleges. When universities did not exist in the 2023 data year, were retrieved from the historical database of <https://nces.ed.gov/ipeds/datacenter/InstitutionByName.aspx?goToReportId=6&sid=bcc1dc4b-7392-478a-a3bb-781e3eca573e&rtid=6>

Campus setting categories (ex. Remote vs distant?)

<https://nces.ed.gov/surveys/annualreports/topical-studies/locale/definitions> – this classification is misleading - however we used this criteria to stay consistent with the classification for the schools which were missing location type. We derived the location type of 14 schools (Independence University, Lincoln College, MacMurray College, Marlboro College, Mills College, Nebraska Christian College, Ohio Valley University, Pine Manor College, San Francisco Art Institute, St. Louis Christian College, University of the Sciences, Urbana University, Wave Leadership College, Wesley College)

Carnegie Classification

The Carnegie Classification® is the leading framework for recognizing and describing institutional diversity in U.S. higher education. In 1970, the Carnegie Commission on Higher Education began developing a classification of colleges and universities to support its program of research and policy analysis. <https://carnegieclassifications.acenet.edu/>

List of Closures

The list regarding university closure was gathered from various sources, looking at past closures from 2020 up to watching recent potential closures by setting news notifications and following the latest news. One of the sources that listed these closures was found here <https://www.insidehighered.com/news/business/financial-health/2023/12/21/look-back-college-closures-and-mergers-2023>. Following up with this list, each individual closure was looked at more closely (specific links to each closure are on the spreadsheet). These sources also mention the reason for closure as well as whether a school is a merger or not upon closure. Reason for closure and Merger information are also collected and verified through looking at multiple sources. The demographic affiliation data was also collected by independent search and sources that aligned on a specific demographic affiliation.
